

September 2025, Fecc is pleased to announce that we have joined the Roundtable on Sustainable Palm Oil (RSPO) as associate member. This step reinforces our commitment to advancing sustainability within the chemical distribution sector and beyond.

Through this membership, Fecc will be able to closely follow and contribute to RSPO's work on sustainable palm oil supply chains.

It will also allow us to support our members in better understanding RSPO requirements, opportunities, and implications for their business.

We are looking forward to further engaging with RSPO and sharing relevant updates, insights, and resources with Fecc members.

Fecc members are welcome to share their needs, questions, or expectations regarding RSPO, so that we can ensure our engagement reflects the interest of our community.
